

WG Digitalization in dentistry , E-Health, and Artificial intelligence
- report before Istanbul meeting 2024

Our group had one online meeting from Limassol (2024) on the 26th of April, 2024. We finalized our proposal: Implementation of Teleconsultation in European Dentistry. After that, the paper was sent to the Board, approved, and sent to the national organizations, and we have some comments now. Hopefully, we will address them at our meeting in Istanbul, make the final material, and prepare for voting for the plenary session in Istanbul or in the future—according to the Board's decision.

Our main author, Prof. Ingrid Różyło-Kalinowska, prepared our study about Digital dentistry education for the ADEE meeting in Leuven, where it will be presented to coordinate activities and impact real education in Europe.

Roman Šmucler,

Chair
